Datagate Trade In Offer Terms & Conditions

The Datagate Trade In offer is pretty simple.

- 1- You purchase a new Datagate
- 2- Send your working DMX Splitter to Enttec along with the serial number of your new Datagate
- 3- Enttec sends you a cheque for the amount you qualify for. Amounts are as follows –
 - Purchase a Datagate D - \$165 back (amount includes GST – see terms below)
 - Purchase a Datagate DM - \$385 back (amount includes GST – see terms below)
 - Purchase a Datagate DME - \$550 back (amount includes GST – see terms below)

Of course, it's never *quite* that simple. All offers are made subject to the following conditions –

Purchases of Datagate models D, DM & DME are to be made through Balanced Technology P/L or approved dealers. Rebates will be handled by Enttec P/L directly.

Purchases must be paid for in full prior to rebate being issued (customers with pre-existing 30-day trading accounts are exempt).

DMX Splitters for trade in must be a **minimum 4-way Splitter** in working condition, supplied with a tax invoice for the rebate amount (see below). Enttec will solely determine whether a splitter is in working condition or not, and the judges decision will be final with no correspondence entered into. Ineligible splitters will be returned upon request, however the purchaser is responsible for all freight costs.

DMX Splitters for trade in must be shipped at the purchaser's expense to the following address –
Enttec Pty Ltd
Level 1/672 Glenferrie Road
Hawthorn Vic 3122

Rebates will be issued by Enttec Pty Ltd within 30 days of receipt of DMX Splitter.

As the rebates are effectively a 'buy-back' under GST legislation, if the purchaser is registered for GST, a tax invoice must be issued to Enttec Pty Ltd for the rebate amount, showing Enttec as the purchaser of your old DMX splitter.

For Availability, Pricing or Further Information, call Balanced Technology
on 1300 305 832.
